ECTS

Easy Compact Tether System

The ECTS is an ultra-portable version of the SAMS-T that utilizes a miniature version of the EG-T. The unit is housed within a custom hard case and is rucksack portable with a weight of 18.5Kg (40 lb.), resulting in rapid adaptability and mobility. The ECTS features a 60m (200 ft) or 100m (330 ft) cyber-secure smart tether cable with Data-Over-Power (DOP) technology and includes all the features and drones available for the SAMS-T, except for the drone not being stored within the case.

The system consists of 3 main components:

Easy Compact Tether System

Albatross or Raptor Drone

Easy Remote Monitoring Software (ERMS)
